On the long side at 1 1/4" on the left side cut from 1" to 4 3/4". At 4 1/4" from the left side cut from 1" to 4 3/4".

Turn horizontal with the shorter uncut side score at 1" from the edge to the cut line 1 1/4". Score opposite side 1 1/4" from the cut line to the right edge. Move to 2" and score from left edge to the score line. Repeat at 2" from the right score line to the right edge.

Move to 4 3/4" (at the top of the cut line) and score from left edge to the cut line. Repeat at 4 3/4" from right cut line to the right edge.

At $3\frac{3}{4}$ " score inside the cut lines. *Score at $7\frac{1}{2}$ " to make a fold to help it stand up. If desired, you can cut the base card at $7\frac{1}{2}$ " and not have the "foot" to help it stand.

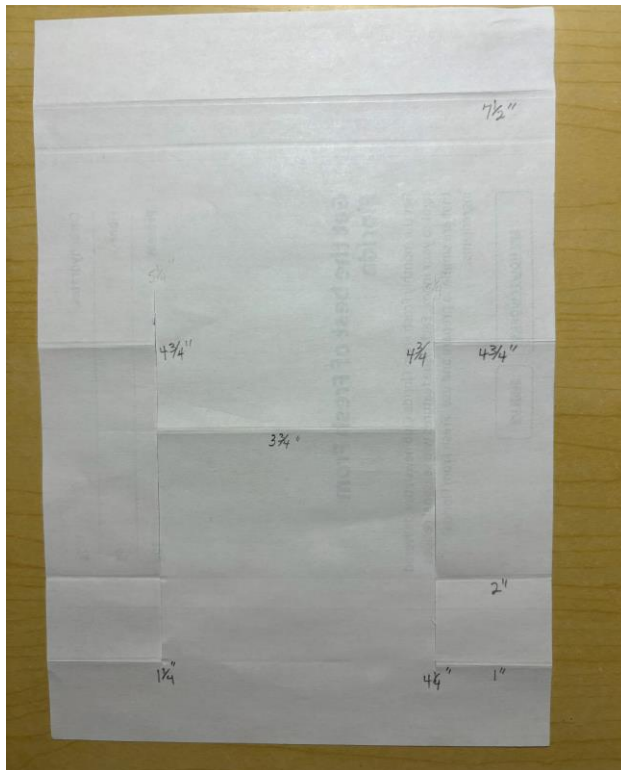

Using the grove die cut the Garden Green square to fit over the DSP in the center fold.

Attach pieces of DSP to the appropriate spaces. Glue square DSP to center fold. Glue "grove" over the DSP on the center fold.

At 1" line fold a mountain. At the 2" line fold a valley. All other folds are mountains.

Stamp with joy and share your card with others. ❤️

*Please note I adjusted the size from Mary's video to make the grove fit.
